

## DevOps Engineer (m/f/d)

AI4BD was founded in Switzerland and has subsidiaries in Germany (Furtwangen, Dresden) and Turkey. The company builds the Cognitive Business Robotics (CBR) platform in order to assist SMEs to reach their digitalization goals efficiently. Therefore, AI4BD offers different solutions, called Coworkers, to solve dedicated business needs based on state-of-the-art Machine Learning, Semantic Web, general web and DevOps technologies. In contrast to other competitors project-driven approaches, the coworkers are easily deployable, configurable and usable with little set-up costs. For our development team in Dresden, we are looking for a DevOps Engineer:

### Tasks / Responsibilities

- Administer the cloud platform environments, including provisioning and operation of compute instances, services, Kubernetes clusters, security, user management.
- Design, implement, support, monitor and maintain infrastructure software platforms, including operating systems, database services, and continuous integration systems.
- Develop automated processes that ensure the infrastructure is configured and managed in a manner which provides confidence that it is robust and can be maintained by developers themselves.

### Required Skills

- General affinity to work in remote environments.
- Great knowledge in Unix: preferred Debian based distros.
- Good knowledge in networking, eg, routing, iptables, (nftables).
- Good knowledge in container environments: Docker and maybe Kubernetes.
- Good knowledge in services like nginx, ssh, dns, ha-proxy, ...
- Good knowledge in scripting, eg, bash or Python.
- Desirable knowledge of backend technologies on the web, such as REST
- Desirable knowledge: Git, Continuous Integration, SQL/NoSQL databases.
- Initiative, curiosity and interest in new technological challenges, motivation and team spirit as well as enjoyment in dealing with complex topics.
- Good English skills, verbal as well as written. German language skills are not essential, but you'll find them very useful.

### And this is why you'll love this job

- Be part of a young, dynamic, highly motivated, and skilled team.
- Work with people who like / enjoy their work. Work with people who like coming to the office every day.
- Use state-of-the-art technologies to build cutting edge products.
- Modern agile development paradigm. Everyone has a voice!
- Flat hierarchy, casual and friendly atmosphere and lots of fun.
- Flexible work time and comparable salary.
- Work in an international team (> 10 nationalities)
- The usual cool stuff: free drinks, coffee - we mean proper coffee! - team events, etc.
